Coastal Bushes

Use of the Digital and Photographic Plant Database Material and Plant List Indexes

The **FMT Culebra Flora Digital Database** is published by **Fundación Mi Terruño Inc. (FMT)** and its author for the viewer's enjoyment and to assist other scientific and research endeavors. It is an effort and pursuit to share systematic botanical knowledge of the **Flora of Culebra, Puerto Rico** in keeping with the foundation's scientific and public educational and conservation goals. The database will be part of the knowledge base that will be used in youth and adult nature appreciation and conservation courses that will be offered once the **Villa Mi Terruño** long term development project commences construction and the *Youth Camp Cabins* and *Nature Appreciation Lodge* become operational. The **Foundation** has been licensed and intends to publish and sale, in one or more series, the content of the **VMT Flora Photo Database** in the future. All **Foundation** revenues and receipts are and will be used for its scientific, educational conservation purposes.
